

Staffing Report - Maternity Base **December-2019** Last updated: **16/01/2020** at **11:15**

Funded WTE	Registered	39.69	Current WTE	Registered	38.7	Number of shifts lost to Sickness Absence	Registered	21
	Unregistered	19.2		Unregistered	18.5		Unregistered	16
	Total	58.89		Total	57.20		Total	37.00

Narrative

The maternity bed occupancy and staffing levels are monitored closely over a 24 hour period. Staff rosters are published 6 weeks in advance, giving the manager time to flex or use bank staff as required. Staffing has been below expected levels in December, this has been due to a slight vacancy, maternity and sick leave. The activity and staffing is monitored 4 hourly by the maternity bleep holder and staff moved to cover areas when required. There has been a recent recruitment of staff and they will be commencing once all pre-employment checks have been completed.

Staffing Concerns	Although there have been instances during the month where staffing levels have not met agreed levels, due to vacancy and staff sickness, the bed occupancy has been reduced and safety has been maintained
Number of shifts where staffing levels are not compliant with planned levels	30
Number of staffing related concerns escalated to Matron or higher	0

Ward Manager's Statement

Maintaining safe staffing levels on the maternity ward is complex due to the unpredictable nature of labour and admissions to the ward. There are approximately 20 admissions and 20 discharges in every 24 hour period. The ward also cares for complex antenatal admissions, some of whom are long stay. A senior midwife reviews the staffing levels every 4 hour across the unit to ensure that safety is maintained at all times. midwives are redeployed to areas with greatest need. There have been no safety issues relating to staffing this month. long term sickness remains high on the maternity ward.

Signed: **Sarah McGrath** Date: **10.1.2020**
